The Garchen Institute

A request to those faithful and fortunate ones who delight in pure actions of virtue:

Although several years have passed since the Dri Thubten Dargye Ling Dharma Center was founded in Singapore, an assembly hall and place of residence has not been established. This not only creates difficulties for the disciples, but in order for the center to become a stable place, I believe that a physical building is crucial for the Dharma center. I consider the establishment of Dharma centers in foreign countries of greatest importance. This is because all welfare and happiness comes about depending on virtuous actions, not just by wishing for them. Thus, the teachings offered at Dharma centers can bring about the temporary and ultimate welfare and happiness for many beings.

Because of this, with hope that this Dharma Center becomes a central place for Buddhist study and practice, I act supportively as much as I can. Thus, I am also extending my request to you to offer your support by making your illusory material wealth meaningful in whichever way you can. If you are able to help, the benefits are tremendous. Supporting the Buddha's teachings to spread and increase in a place where they have not, is greater than offering support in a place where the Buddha's teaching have already spread and flourished. For this reason, as this is very meaningful, it is important that I request my disciples and Dharma companions to offer your support. Thus, by all means I am humbly requesting your virtuous support with continuous prayers.

Gar Könchok Gyaltzen, on June 25, 2010
